Crime Analysis

A set of systematic, analytical processes directed at providing timely and pertinent information relative to crime patterns and trend correlations to assist the operational and administrative personnel in planning the deployment of resources for the prevention and suppression of criminal activities, aiding the investigative process, and increasing apprehensions and the clearance of cases. Within this context, Crime Analysis supports a number of department functions including patrol deployment, special operations, and tactical units, investigations, planning and research, crime prevention, and administrative services (budgeting and program planning). --Steven Gottlieb et al., 1994, "Crime Analysis: From First Report to Final Arrest."

TO: Office of the Chief of Police

FROM: Det. Sgt. Kurt Fasulo #63

SUBJECT: Crime Analysis Report April 2019

*During the month of April 2019, the Guilford Police Department had the following **Part 1** and selected **Part 2** Crimes reported: Reference Appendix A for further information. This information was compiled via the NEXGEN system utilizing a query of all Part 1 Crimes and select Part 2 crimes from the computer database. A full review of each queried case file report was completed.*

The Guilford Police Department investigated 1027 cases for the month of April. This is a three percent (3%) increase in calls from the previous month.

Burglary Cases

None reported.

Criminal Mischief Cases:

There was a total of thirteen (13) criminal mischief cases filed for the month of April. This is an increase in criminal mischief cases from March in which there were twelve (12). One (1) of the thirteen cases involved damage to public property; the remaining twelve (12) involved damage to private property.

There are two graphs provided in Appendix B for these incidents. Six (6) of the thirteen reported incidents reflect the time the report was filed and not the time at which the crime is being committed. These were reported after the damage was observed and the exact time and date of the occurrence is unknown. A second graph showing the day and time of offense has been included in this report.

There were no arrests made for criminal mischief in the month of April. There was one (1) solved case for this month in which the complainant no longer wished to pursue criminal charges upon receiving restitution.

There was no pattern nor significant modus operandi established during analysis of these incidents and thus no response plan was developed.

Reference Appendix B for a graphic representation.

Larceny Cases:

There were eight (8) larceny cases reported during the month of April. Two (2) of the eight cases were solved. There were no arrests made as a result of these larceny cases as the victims no longer wished to pursue charges.

The larceny types are as follows: Two (2) shoplifting and six (6) general larceny.

For six (6) of these larceny cases the exact date and time that the larceny occurred has not been determined. Thus, the date and time shown in the related graph reflects only that of the date/time reported. A separate graph has been provided which depicts day and time the offense was completed, if known.

The number of larceny cases increased from March (5) to April.

The fraud cases for the month of April are as follows: Ten (10) General Fraud, three (3) Fraud via Internet and four (4) Fraud Identity Theft. These fraud incidents all involved complainants who were reimbursed or did not experience any loss; thus, these cases are not included in the monthly totals for larceny cases.

This is the second consecutive month in which no larceny from motor vehicle complaints were received. Recent arrests were made by neighboring agencies which included suspects for the incidents from previous months.

Reference Appendix C for a graphic representation.

Robbery Cases:

None reported.

Larceny of MV Cases:

None reported.

Aggravated Assault/Simple Assault:

None reported.

Arson Cases:

None reported.

Rape/Sex offense Cases:

There was one (1) reported sexual assault for the month of April. Per Connecticut General Statutes, the details of this case will remain confidential.

Homicide Cases:

None reported.

Information and Intelligence received on criminal activity:

CTIC provided LEO intelligence during this month. The New England State Police Information Network also served as a source of intelligence as did the Law Enforcement Information Exchange (LInX). Guilford Police also monitors Crimedex Law Enforcement Portal for updated information on financial crime trends. Crime intelligence sharing is also monitored through New Haven Police Department's SLACK program.

Intelligence meetings were held with the Middlesex County Detective Association and New Haven MDT in regard to ongoing criminal activity in all attending agencies' jurisdictions.

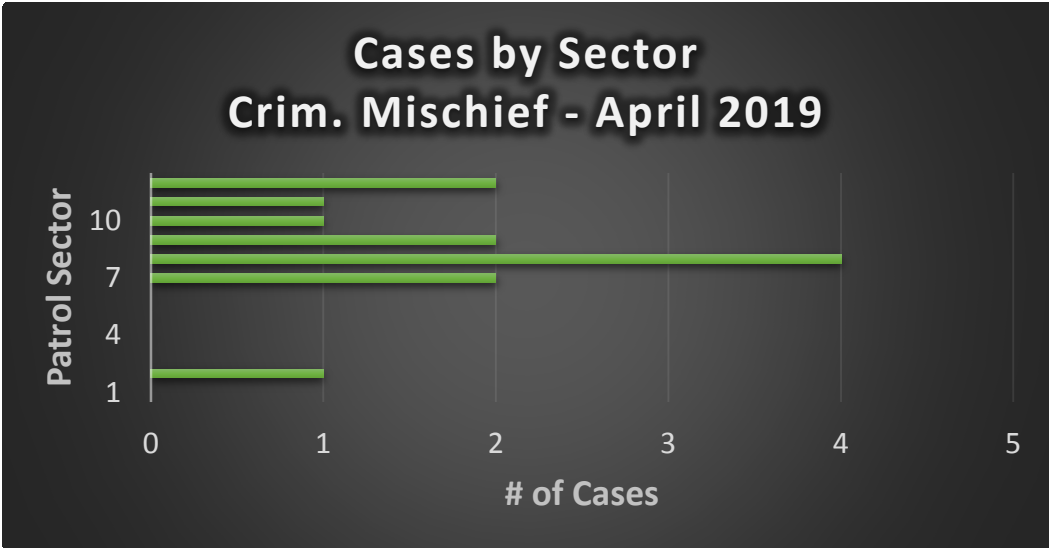

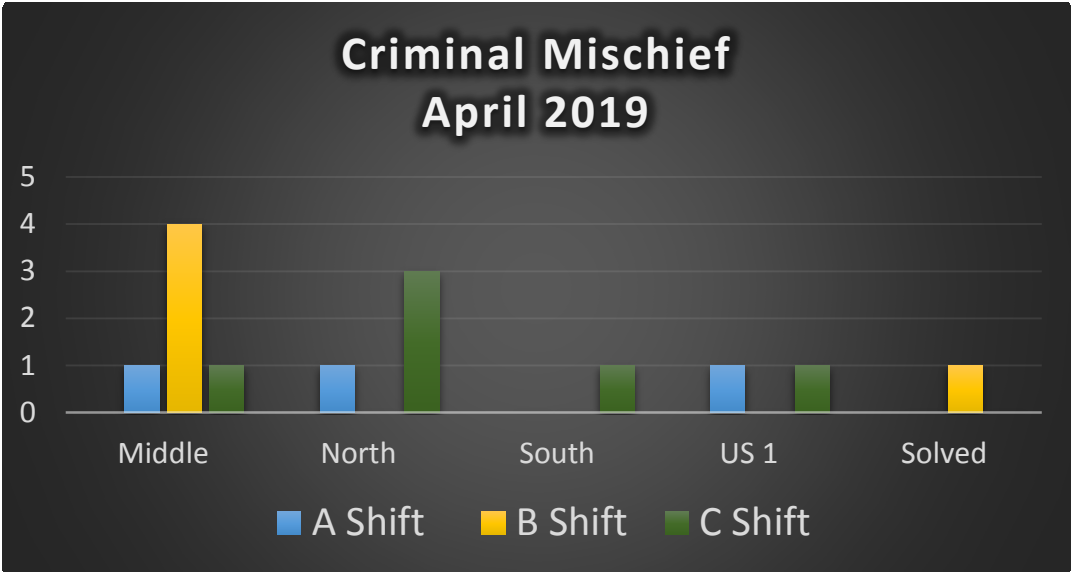

Respectfully submitted,

Det. Sgt. Kurt Fasulo
