Crime Analysis

A set of systematic, analytical processes directed at providing timely and pertinent information relative to crime patterns and trend correlations to assist the operational and administrative personnel in planning the deployment of resources for the prevention and suppression of criminal activities, aiding the investigative process, and increasing apprehensions and the clearance of cases. Within this context, Crime Analysis supports a number of department functions including patrol deployment, special operations, and tactical units, investigations, planning and research, crime prevention, and administrative services (budgeting and program planning). --Steven Gottlieb et al., 1994, "Crime Analysis: From First Report to Final Arrest."

TO: Office of the Chief of Police

FROM: Det. Sgt. Kurt Fasulo #63

SUBJECT: Crime Analysis Report May 2019

*During the month of May 2019, the Guilford Police Department had the following **Part 1** and selected **Part 2** Crimes reported: Reference Appendix A for further information. This information was compiled via the NEXGEN system utilizing a query of all Part 1 Crimes and select Part 2 crimes from the computer database. A full review of each queried case file report was completed.*

The Guilford Police Department investigated 1001 cases for the month of May. This is a three percent (3%) decrease in calls from the previous month.

Burglary Cases

There were two reported burglaries during the month of May, which is an increase from the previous month in which there were none reported. One burglary was to a commercial building and a suspect has been identified with an arrest warrant forthcoming. There were no patterns nor significant modus operandi identified to initiate a response plan.

Reference Appendix B for a graphic representation.

Criminal Mischief Cases:

There was a total of eight (8) criminal mischief cases filed for the month of May. This is a decrease in criminal mischief cases from April in which there were thirteen (13). Four (4) of the eight cases involved damage to public property; the remaining four (4) involved damage to private property.

Seven (7) of the eight reported incidents reflect the time the report was filed and not the time at which the crime is being committed. These were reported after the damage was observed and the exact time and date of the occurrence is unknown. A second graph showing the day and time of offense has been included in this report.

There were no arrests made for criminal mischief in the month of May. There was one (1) solved case for this month in which the complainant no longer wished to pursue criminal charges once the suspect was identified.

There was no pattern nor significant modus operandi established during analysis of these incidents and thus no response plan was developed.

Reference Appendix C for a graphic representation.

Larceny Cases:

There were ten (10) larceny cases reported during the month of May. Two (2) of the ten cases were solved. There was one arrest made as a result of these larceny cases, the victim declined to pursue charges in the second case.

The larceny types are as follows: Two (2) shoplifting, one (1) theft from motor vehicle, and seven (7) general larceny.

For eight (8) of these larceny cases the exact date and time that the larceny occurred has not been determined. Thus, the date and time shown in the related graph reflects only that of the date/time reported. A separate graph has been provided which depicts day and time the offense was completed, if known.

The number of larceny cases increased from April (8) to May.

The fraud cases for the month of May are as follows: Thirteen (13) General Fraud and one (1) Fraud Identity Theft. These fraud incidents all involved complainants who were reimbursed or did not experience any loss; thus, these cases are not included in the monthly totals for larceny cases.

There were no trends nor significant modus operandi detected to warrant development of a response plan.

Reference Appendix D for a graphic representation.

Robbery Cases:

None reported.

Larceny of MV Cases:

None reported.

Aggravated Assault/Simple Assault:

None reported.

Arson Cases:

None reported.

Rape/Sex offense Cases:

There was one (1) reported sexual assault for the month of May. Per Connecticut General Statutes, the details of this case will remain confidential.

Homicide Cases:

None reported.

Information and Intelligence received on criminal activity:
CTIC provided LEO intelligence during this month. The New England State Police Information Network also served as a source of intelligence as did the Law Enforcement Information Exchange (LInX). Guilford Police also monitors Crimedex Law Enforcement Portal for updated information on financial crime trends. Crime intelligence sharing is also monitored through New Haven Police Department's SLACK program.

Intelligence meetings were held with the Middlesex County Detective Association and New Haven MDT in regard to ongoing criminal activity in all attending agencies' jurisdictions.

Respectfully submitted,

Det. Sgt. Kurt Fasulo
