Crime Analysis

A set of systematic, analytical processes directed at providing timely and pertinent information relative to crime patterns and trend correlations to assist the operational and administrative personnel in planning the deployment of resources for the prevention and suppression of criminal activities, aiding the investigative process, and increasing apprehensions and the clearance of cases. Within this context, Crime Analysis supports a number of department functions including patrol deployment, special operations, and tactical units, investigations, planning and research, crime prevention, and administrative services (budgeting and program planning). --Steven Gottlieb et al., 1994, "Crime Analysis: From First Report to Final Arrest."

TO: Office of the Chief of Police

FROM: Det. Sgt. Kurt Fasulo #63

SUBJECT: Crime Analysis Report October 2019

During the month of October 2019, the Guilford Police Department had the following ***Part 1*** *and selected* ***Part 2*** *Crimes reported: Reference Appendix A for further information. This information was compiled via the NEXGEN system utilizing a query of all Part 1 Crimes and select Part 2 crimes from the computer database. A full review of each queried case file report was completed.*

The Guilford Police Department investigated 990 cases for the month of October. This is an eight percent (8%) decrease in calls from October 2018 (1078).

Burglary Cases

There was one reported burglary during the month of October. The burglary was to a residence and a suspect has been developed. There were no patterns nor significant modus operandi identified to initiate a response plan.

There was a decrease in burglaries when compared to October 2018 (10).

Reference Appendix B for a graphic representation.

Criminal Mischief Cases:

There was a total of thirty (30) criminal mischief cases filed for the month of October. This is an increase in criminal mischief cases from October 2018 in which there were fifteen (15). Five (5) of the thirty cases involved damage to public property; the remaining cases involved damage to private property.

Twelve (12) of the thirty reported incidents reflect the time the report was filed and not the time at which the crime is being committed. These were reported after the damage was observed and the exact time and date of the occurrence is unknown. Most complainants believed the damage to have occurred during the overnight hours. A second graph showing the day and time of offense has been included in this report.

There were no arrests made for criminal mischief in the month of October. Eleven (11) of the thirty cases were solved; however, the suspects were not arrested per the complainants wishes.

The majority of these cases appear to be the result of two different groups committing most offenses. One group has been identified and enforcement action taken. The other group has been identified and the investigation is ongoing. Those cases aside, there were no patterns nor trends for these incidents and no response plan has been developed.

Reference Appendix C for a graphic representation.

Larceny Cases:

There were sixteen (16) larceny cases reported during the month of October. One (1) of the sixteen cases was solved. There were no arrests made as a result of these larceny cases as in the lone solved case the victim no longer wished to pursue charges.

The larceny types are as follows: Four (4) shoplifting, two (2) theft from motor vehicle, six (6) theft from mail, and four (4) general larceny.

For nine (9) of these larceny cases the exact date and time that the larceny occurred has not been determined. Thus, the date and time shown in the related graph reflects only that of the date/time reported. A separate graph has been provided which depicts day and time the offense was completed, if known.

The number of larceny cases decreased from October 2018 (18).

The fraud cases for the month of October are as follows: Nine (9) General Fraud, two (2) Identity Thefts, and four (4) Fraud with a Credit Card. These fraud incidents all involved complainants who were reimbursed or did not experience any loss; thus, these cases are not included in the monthly totals for larceny cases.

There has been an increase in thefts from mail. An interagency meeting was held with the United States Postal Inspectors reference this crime trend as numerous communities have been affected. Suspects have been identified and arrest warrants are pending. Patrol plans have been developed with planned action to combat these thefts.

Reference Appendix D for a graphic representation.

Robbery Cases:

None reported.

Larceny of MV Cases:

There was one larceny of motor vehicle case for the month of October. The case is still being investigated and there have been no trend factors identified to warrant development of a response plan. The vehicle has been recovered and returned to the owner.

Aggravated Assault/Simple Assault:

None reported.

Arson Cases:

None reported.

Rape/Sex offense Cases:

There was one (1) reported sexual assault for the month of October. Per Connecticut General Statutes, the details of this case will remain confidential.

This is an increase from 2018 (0).

Homicide Cases:

None reported.

Information and Intelligence received on criminal activity:
CTIC provided LEO intelligence during this month. The New England State Police Information Network also served as a source of intelligence as did the Law Enforcement Information Exchange (LInX). Guilford Police also monitors Crimedex Law Enforcement Portal for updated information on financial crime trends. Crime intelligence sharing is also monitored through New Haven Police Department's SLACK program.

Intelligence meetings were held with the Middlesex County Detective Association, United States Postal Inspectors, and New Haven MDT in regard to ongoing criminal activity in all attending agencies' jurisdictions.

Respectfully submitted,

Det. Sgt. Kurt Fasulo
