## Crime Analysis

A set of systematic, analytical processes directed at providing timely and pertinent information relative to crime patterns and trend correlations to assist the operational and administrative personnel in planning the deployment of resources for the prevention and suppression of criminal activities, aiding the investigative process, and increasing apprehensions and the clearance of cases. Within this context, Crime Analysis supports a number of department functions including patrol deployment, special operations, and tactical units, investigations, planning and research, crime prevention, and administrative services (budgeting and program planning). --Steven Gottlieb et al., 1994, "Crime Analysis: From First Report to Final Arrest."

*TO: Office of the Chief of Police*

*FROM: Det. Sgt. Kurt Fasulo #63*

*SUBJECT: Crime Analysis Report June 2020*

*During the month of June 2020, the Guilford Police Department had the following **Part 1** and selected **Part 2** Crimes reported: Reference Appendix A for further information. This information was compiled via the NEXGEN system utilizing a query of all Part 1 Crimes and select Part 2 crimes from the computer database. A full review of each queried case file report was completed.*

The Guilford Police Department investigated 674 cases for the month of June. This is a thirty-seven percent (37%) decrease in calls from June 2019 (1069). The decrease in call volume can be attributed to the coronavirus pandemic.

### **Burglary**

There was one reported burglary during the month of June. The lone burglary was to a commercial building in the early morning hours. The case appears to be connected to a number of similar commercial burglaries throughout Connecticut and Guilford Detectives are coordinating with other agencies to gather intelligence.

The number of burglaries remained the same when compared to June 2019 (1).

Reference Appendix B for a graphic representation.

### **Criminal Mischief**

There were sixteen (16) criminal mischief cases for the month of June. Fourteen (14) of the sixteen cases involved damage to private property and five (5) of these cases likely were committed by the same suspect(s). There were no arrests made for criminal mischief in the month of June however, there are currently arrest warrants pending for two of these cases. The remaining two (2) cases involved damage to public property.

Nine (9) of the incidents reflect the time the reports were filed and not the time at which the crime was committed. These were reported after the damage was observed and the exact time and date of the occurrences is unknown. No trend nor pattern was identified to warrant the development of a response plan.

The number of criminal mischief cases remained the same from June 2019 (16).

Reference Appendix C for a graphic representation.

### **Larceny**

There were seven (7) larceny cases reported during the month of June. Three (3) of the seven cases were solved and one arrest was made. In one case the suspect has been identified and charges are pending. In the remaining case the complainant received restitution and no longer wished to pursue criminal charges.

The larceny types are as follows: Two (2) shoplifting, one (1) theft from residence, two (2) thefts from mail, and two (2) general larceny.

For four (4) of these larceny cases the exact date and time that the larceny occurred has not been determined. Thus, the date and time shown in the related graph reflects only that of the date/time reported. A separate graph has been provided which depicts day and time the offense was completed, if known.

The number of larceny cases decreased from June 2019 (9).

The fraud cases for the month of June are as follows: Four (4) General Fraud, Five (5) Fraud – Identity Theft, Eight (8) Fraud via Internet, and one (1) Fraud with a Credit Card. These fraud incidents mostly were attempts to defraud victims of funds. In some cases, the involved complainants were reimbursed or did not experience any loss. In total there was **\$28,378.34** in losses experienced from these incidents. The increase in the number of fraud cases can likely be attributed to the current social distancing and quarantine suggestions causing an increase in online presence among the general population. The Guilford Police Department is exploring additional avenues for educating the public on fraud and scam trends.

Reference Appendix D for a graphic representation.

### **Robbery**

None reported. This remained consistent with June 2019 (0).

### **Larceny of MV**

There was one (1) larceny of motor vehicle case for the month of June. The case is still being investigated. There have been no trend factors identified to develop a response plan. All vehicles have been recovered and returned to the owners. This remained consistent with June of 2019 (1).

### **Aggravated Assault/Simple Assault**

None reported. This is a decrease from June of 2019 (1).

**Arson:**

None reported. This remained consistent with June of 2019 (0).

**Sexual Assault/ Sex Offense:**

There were no reported sexual assaults for the month of June. This is a decrease from June 2019 (1).

**Homicide**

None reported. This remained consistent with June 2019 (0).

**Criminal Activity Information and Intelligence**

CTIC provided LEO intelligence during this month. The New England State Police Information Network also served as a source of intelligence as did the Law Enforcement Information Exchange (LInX). Guilford Police also monitors Crimedex Law Enforcement Portal for updated information on financial crime trends. Crime intelligence sharing is also monitored through the New Haven Police Department's SLACK channel as well as internally utilizing the Guilford PD SLACK channel.

Intelligence meetings were not held during the month of June for the Middlesex County Detective Association and Shoreline Detectives due to COVID – 19 precautions. New Haven MDT meetings were held virtually in regard to ongoing criminal activity in all attending agencies' jurisdictions.

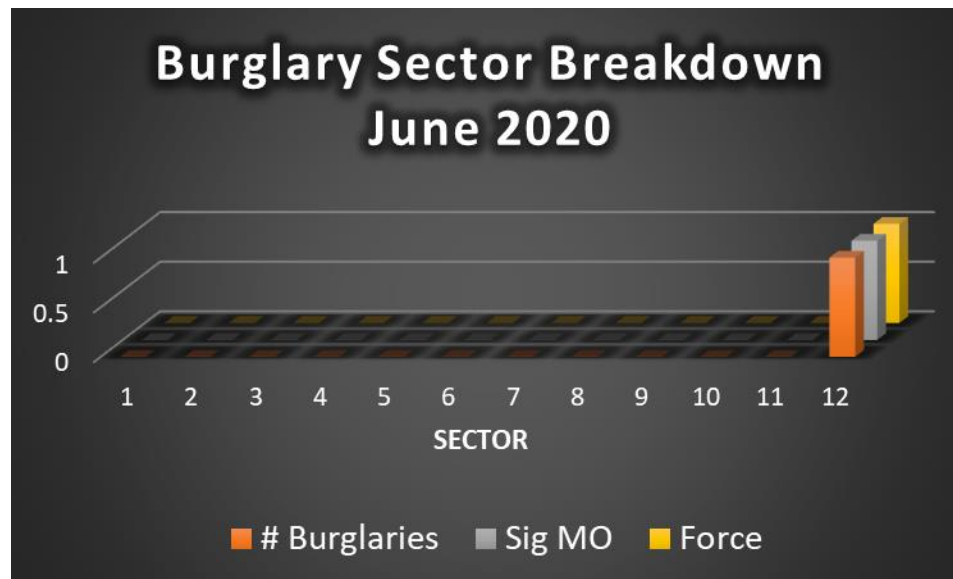

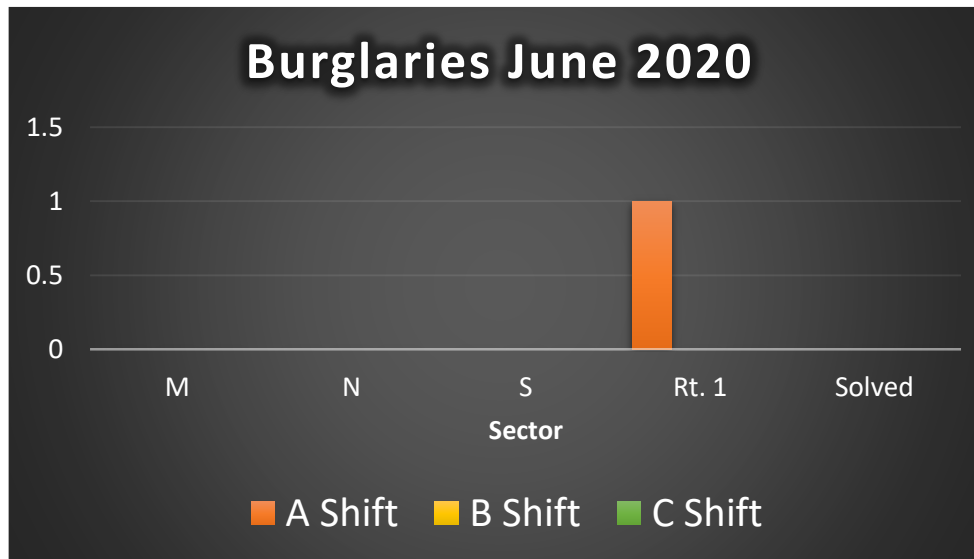

Respectfully submitted,

*Det. Sgt. Kurt Fasulo*
