## Crime Analysis

A set of systematic, analytical processes directed at providing timely and pertinent information relative to crime patterns and trend correlations to assist the operational and administrative personnel in planning the deployment of resources for the prevention and suppression of criminal activities, aiding the investigative process, and increasing apprehensions and the clearance of cases. Within this context, Crime Analysis supports a number of department functions including patrol deployment, special operations, and tactical units, investigations, planning and research, crime prevention, and administrative services (budgeting and program planning). --Steven Gottlieb et al., 1994, "Crime Analysis: From First Report to Final Arrest."

*TO: Office of the Chief of Police*

*FROM: Det. Sgt. Kurt Fasulo #63*

*SUBJECT: Crime Analysis Report November 2020*

*During the month of November 2020, the Guilford Police Department had the following **Part 1** and selected **Part 2** Crimes reported: Reference Appendix A for further information. This information was compiled via the NEXGEN system utilizing a query of all Part 1 Crimes and select Part 2 crimes from the computer database. A full review of each queried case file report was completed.*

The Guilford Police Department investigated 672 cases for the month of November. This is a forty-seven percent (47%) decrease in calls from November 2019 (1279).

### **Burglary**

There were two (2) reported burglaries during the month of November. There was one burglary to the garage of a residence. This was in connection to a number of motor vehicles entered and stolen motor vehicles from the same evening. The second burglary was to a commercial building during the early morning hours with an unsuccessful ATM theft.

The number of burglaries remained consistent when compared to November 2019 (2).

Reference Appendix B for a graphic representation.

### **Criminal Mischief**

There were ten (10) criminal mischief cases for the month of November. All but two of the ten cases involved damage to private property. There were no arrests made for criminal mischief in the month of November. The remaining two cases involved damage to public property. The majority of criminal mischief cases were damage to privately owned mailboxes and are suspected to have occurred during the late evening to early morning hours. However, there was not enough information available to provide a more constricted timeframe. The location data coupled with the lack of time specificity made development of a response plan infeasible.

Six (6) of the incidents reflect the time the reports were filed and not the time at which the crime was committed. These were reported after the damage was observed and the exact time and date of the occurrences is unknown. No trend nor pattern was identified to warrant the development of a response plan.

The number of criminal mischief cases increased when compared with November 2019 (3).

Reference Appendix C for a graphic representation.

### *Larceny*

There were twenty-seven (27) larceny cases reported during the month of November. One (1) of the cases was solved and has resulted in an arrest.

The larceny types are as follows: Three (3) shoplifting, nineteen (19) thefts from motor vehicle, one (1) embezzlement, and four (4) general larceny.

For ten (10) of these larceny cases the exact date and time that the larceny occurred has not been determined. Thus, the date and time shown in the related graph reflects only that of the date/time reported. A separate graph has been provided which depicts day and time the offense was completed, if known.

The number of larceny cases increased from November 2019 (10).

The fraud cases for the month of November are as follows: three (3) General Fraud, one (1) Fraud via Internet, and five (1) Fraud – Identity Theft. These fraud incidents mostly were attempts to defraud victims of funds. In some cases, the involved complainants were reimbursed or did not experience any loss. In total there was **\$14,908.02** in losses experienced from these incidents.

Reference Appendix D for a graphic representation.

### *Robbery*

There was one (1) robbery case for the month of November. The case is being actively investigated and there is significant suspect information developed. An arrest warrant application is being completed. There was no pattern nor trend identified and therefore no response plan was developed.

This was an increase when compared with November 2019 (0).

### *Larceny of MV*

There were two (2) stolen motor vehicle cases for the month of November. Both vehicles were stolen on the same night and were connected to numerous motor vehicles entered in the area.

This is an increase when compared with November of 2019 (1).

**Aggravated Assault/Simple Assault**

There was one (1) reported assault case for the month of November. This is an increase from November of 2019 (0).

**Arson:**

None reported. This remained consistent with November of 2019 (0).

**Sexual Assault/ Sex Offense:**

There was one (1) reported sexual assault for the month of November. The case is still being investigated and details of the case remain confidential pursuant to Connecticut General Statutes.

This is remained consistent with November 2019 (1).

**Homicide**

None reported. This remained consistent with November 2019 (0).

**Criminal Activity Information and Intelligence**

CTIC provided LEO intelligence during this month. The New England State Police Information Network also served as a source of intelligence as did the Law Enforcement Information Exchange (LInX). Guilford Police also monitors Crimedex Law Enforcement Portal for updated information on financial crime trends. Crime intelligence sharing is also monitored through the New Haven Police Department's SLACK channel as well as internally utilizing the Guilford PD SLACK channel. The Detective Unit continues to monitor social media and the anonymous tip line for gathering and evaluating criminal intelligence.

Intelligence meetings were not held during the month of November for the Middlesex County Detective Association and Shoreline Detectives due to COVID – 19 precautions. New Haven MDT meetings were held virtually in regard to ongoing criminal activity in all attending agencies' jurisdictions.

Respectfully submitted,

*Det. Sgt. Kurt Fasulo*
